Meeting Info

Regular chapter meetings are held on the third Thursday of the month (except in June, July, and August which have other events).

Meetings start at 7 pm with a social half-hour preceding the main meeting. We clean up and exit by 9:30 pm.

Location: All Saints Episcopal Church - At the corner of SE 40th and Woodstock, Portland, Oregon

Our April Speaker

By **Brenda Ziegler**

Our speaker for our Annual Meeting on April 18th, 2013 will be Carson Lord. Carson currently serves as the President of OAN, the Oregon Association of Nurseries.

He received his BFA from the School of Visual Arts in New York City and holds an MBA from George Fox University.

Carson owns and operates Tree Frog Nursery, a wholesale nursery in Silverton, OR. Tree Frog Nursery produces container-grown grafted conifers, Japanese maples, topiaries and boxwoods. For more information, please see: <http://www.treefrogtrees.com>.

He has also served on the Board of the Oregon Garden Foundation, most recently as the Board Chair in 2011-2012.

Carson was born and raised in Silverton, OR, and lived in New York City and Portland for four years each.

He is married to Colette; they have 3 children, ages 7, 5 and 1.

I met Carson when he was living in Portland, working for Oregon Trout, a non-profit dedicated to saving trout and salmon. Oregon Trout has now merged with Freshwater Trust.

He has long been involved with non-profits and with promoting nature. When he started Tree Frog Nursery, it was a natural progression. The Oregon Garden and the OAN are fortunate to have such an ambitious member serve on their boards, and we are fortunate to have him speak to our Chapter.

Our April 18th meeting is the Annual Meeting when we vote on five new nominees for our Board, and we also have our Hybrid Rhododendron Auction.

Now that's a meeting!

Purpose

To encourage interest in and disseminate information and knowledge about the genus *Rhododendron*.

To provide a medium through which all persons interested in the genus may communicate with others through education, scientific studies, meetings, publications, and other similar activities.

The Portland Chapter of the American Rhododendron Society is registered in Oregon as a 501 (C)(3) non-profit organization. Dues and donations are qualified charitable tax deductions.

A midwinter's dusk
Mounting clouds from sun to shadow
to oblivion

A radiant sun
replacing a winter's rain
The wren has returned

Long winter shadows
The warmth of the sun; stirring

Show and Tell

Please remember to bring a show and tell item from your garden to the meeting. We are establishing a new tradition, sharing information about our rhododendron companion plants with our fellow members. What's in your garden? Or greenhouse, for that matter, sharing space with vireyas and other tender rhododendrons, perhaps ?

Portland Chapter Board Meeting Highlights: March 26, 2013**By Maria Stewart**

We reviewed the Early Show and Plant Sale schedule, publicity, set-up and take-down. Continuing on from the February board meeting, we discussed ways to increase our membership and to retain our current members. To include an "Ask the Expert" or mini-program in our regular meetings was one idea, among others, that we decided would be good to reinstate. Another topic of discussion was the lace bug pest and what we could do about educating the public about that pest. We have set a goal to produce and disseminate information about lace bug. A committee was formed to investigate improving our sound system for our meetings.

Highlights of the February 21, 2013 Meeting

By Tom Hoffman

Our speaker for the March 21st meeting was Kathy Van Veen. Her most interesting and entertaining talk, "How to Reduce, Reuse, and Recycle in the Nursery Business", illustrated with a wonderful collection of images of the history and the founders of Van Veen Nursery, up to the present day, was well-received by an appreciative audience. Kathy's often hilarious stories of events that have happened on the nursery grounds over the years suggest the positive role the nursery plays in the neighborhood under Kathy's guidance. Her dedication to 'green' practices is an inspiration and her talk confirmed for many of us the value of our own efforts to "Reduce, Reuse and Recycle" when it comes to our gardens and greenhouses.

The "Show and Tell" portion of the meeting featured 16 rhododendron trusses brought in by Peter Kendall, along with several Pulmonaria cultivars and a bouquet of Hellebore. Proud possessors of yellow-flowered Hellebore agreed to save seed for the less fortunate members present. Scilla siberica, Chionodoxa, early Narcissus for bulbs, and several early Camellia blooms were also shown.

Mike Domaschofsky reported on the Chapter's display at the EXPO, where our lace bug outreach was appreciated by the attendees, and on preparations for the Early Show and Sale at Crystal Springs Rhododendron Garden April 6th & 7th.

We hope for a positive report on the Smith Garden work party on March 23rd at our April meeting. The Smith Garden team were recruiting taller members for dead-heading at the garden, at the March meeting.

Cecil and Molly Smith Garden Open Days this Spring

The Cecil and Molly Smith Garden, world-renowned for its collection of species and hybrid rhododendrons, will be open during the blooming season, Saturdays and Sundays, April 6 through May 19, 11:00 AM until 4:00 PM. This three-acre natural woodland setting also features choice trees, shrubs, wildflowers and bulbs, including Cyclamen, Trillium, Erythronium and Narcissus, which complement the over 600 rhododendrons and azaleas. Established in the early 1950's, the garden contains many rare species grown by Cecil Smith from seeds imported from China and cuttings from England, as well as hybrids he developed. The Portland Chapter of the ARS purchased the garden in 1983 and, along with the Willamette and Tualatin Valley Chapters, now manages and maintains it. A selection of plants featured in the garden is available for purchase. There is a modest entrance fee of \$3.00. Due to the sloping site, the garden is not considered handicap accessible. The garden is located at 5065 Raybell Rd., St. Paul, OR 97137, 7/10ths of a mile west of Hwy. 219 between St. Paul and Newberg. Turn west on Champoeg Rd. (look for the blue Heirloom Roses sign) and continue straight on to Raybell Rd. to the garden. Parking and entrance are on the right just past the house with the garden address. For more information, call Ginny Mapes at 503-647-2896; www.smithgarden.org. This spring, don't miss this hidden gem which has been featured in *Horticulture* magazine.

Hybrid Rhododendron Auction at the April 18th Annual Meeting

Be sure to bring your wish-lists, wallets and checkbooks to our April 18th Annual Meeting . In addition to our speaker and elections to our Board, we will have our annual hybrid rhododendron auction. This promises to be a lively and fun evening!

The Lovely *Rhododendron lutescens*

By Maria Stewart

There is a rotting five-foot Douglas fir stump about 10 feet from our front room. Growing in this naturally well-drained decaying wood are wild huckleberries, salal, ferns and a *R. lutescens*; we planted the *R. lutescens* at the base of the stump about 20 years ago. Lo and behold, it grew right through the stump and now we have plants on both sides of the stump. This species grows in a willowy and upright manner and looks at home when it is winding its way among other plants. *R. lutescens* is blooming now in late March with its yellow blossoms adding cheerful color to the surrounding landscape, which consists this time of the year of mostly pink and white blooming rhododendrons. After the blooms fade, this species puts on another show of color with its distinctive reddish new growth. The vibrantly colored leaves are like a second stage of blooming!

More information about *R. lutescens*:

Distribution: West Sichuan, Northeast Yunnan, Hubei and Guizhou in China, at 1,750 - 10,500 feet altitude, in the open in a thicket or among trees

Taxonomy: Subgenus: *Rhododendron*
Section: *Rhododendron*
Subsection: *Triflora*

It is a lepidote with a few scales on top of the leaves; the undersides of the leaves are paler. The shape of the leaf is oblong or lanceolate. The new growth is a bright reddish bronze.

Blooms: light to deeper primrose yellow; wide, funnel-shaped; 1-3 corollas per truss.

Hardiness: +5 degrees F. Depending on the clone, the larger the flowers, the more tender the plant according to *The Encyclopedia of Rhododendron Species*, authored by Peter and Kenneth Cox. (Our plant suffers somewhat during Arctic blasts; buds freeze and leaves burn, but it keeps coming back!)

Height: depends on whether it grows vertically or somewhat less vertically as it finds its way among your other plants. The books say it grows to 6 feet in 10 years.

Derivation of name: *lutescens*: becoming yellow Photograph courtesy of Mike Stewart
